Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments filed April 25, 2005 have been fully considered but they are not persuasive.

- 1. In the remarks, Applicant argued in substance that Auerbach is silent regarding an interceptor monitors communications between the server program and the object providers and performs at least one of verifying license validity and recording a fee for use of an object.
- 2. Examiner respectfully traverses Applicant's remarks.
- 3. Auerbach suggests an interceptor monitors communications between the server program and the object providers and performs at least one of verifying license validity and recording a fee for use of an object (service providers typically require a paid scription to access its content data...the user initially logs onto the primary service provider with a user name and password...the system permits logon procedures to continue with the secondary service provider(s); col.10, lines 30-43).
